1. Posizionare i profili per cartongesso alla altezza desiderata.
1. Place the profiles for plasterboard at the required height.

2. Lasciare tra i profili una distanza di 56 mm. per l'inserimento del traverso spin. Inserire nella struttura del cartongesso il traverso spin.
2. Leave the distance of 56 mm between the profiles in order to insert the spin upper frame. Insert in the structure for plasterboard the upper frame.

3. Posizionare il traverso spin nella posizione corretta. Il traverso viene fornito 4 mm. piu' corto della larghezza del vano. Mantenere la stessa distanza tra le due pareti (2 mm.).

3. Place the spin upper frame in the right position. The upper frame is supplied 4. mm shorter than the width of the opening. Keep the same distance between the two walls (2 mm.).

4. Fissare il traverso spin perfettamente in piano, alla struttura del cartongesso.

4. Fix the spin upper frame perfectly level to the plasterboard structure.

5. Fissare le lastre di cartongesso, verniciare il traverso dello stesso colore del soffitto.
5. Fix the plasterboard slab and paint the upper frame in the same colour of the ceiling.

6. Rilevare altezza pavimento cartongesso.
6. Measure the height floor - plasterboard.

7. Utilizzando il filo a piombo, segnare sul pavimento la corretta corrispondenza con il perno sul traverso superiore.
 7. Mark on the floor the correct correspondence with the pivot on the upper frame using the plumb line.

Distanza tra la parete e il foro per il perno a pavimento.
 Distance between the wall and the hole for the floor pivot.

8. Forare il pavimento. Foro Ø20 x 35 mm / 9. Inserire il perno di rotazione (verificare se sono presenti eventuali impianti a pavimento).
 8. Drill the floor. Hole Ø20 x 35 mm / 9. Insert the rotating pivot (please check for any obstructions)

10. Infilare l'anta sopra al perno a pavimento.
 10. Insert the door on the floor pivot.

11. Aprire a 90° la porta. / 12. Mantenendo l'anta aperta far scendere il perno superiore agendo sulla vite del cardine posto nel telaio.
 11. Open the door at 90°. / 12. Keeping the door open, allow the upper pivot to fall, acting on the hinge placed in the frame.

13. Chiudere l'anta e verificare la chiusura.
 13. Close the door anche check the proper closure of the door.

14. Agire sulla vite del cardine per far salire il perno. / 15. Per effettuare le regolazioni è necessario togliere l'anta dalla sua sede.
 14. Act on the hinge screw to raise the pin. / 15. To adjust it is necessary to remove the door.

16. Regolare e stringere vite. / 17. Per regolare il perno a pavimento toglierlo dalla sua sede.
 16. Adjust and tighten the screw. / 17. To adjust the floor pin, remove it from its place.

18

18. Svitare il primo grano dal perno a pavimento.
18. Unscrew the first dowel from the floor pivot.

19

19. Agire sul secondo grano facendolo sporgere della misura desiderata.
19. Rotate the second screw until it reaches the desired height.

20. Sistemare nuovamente il perno nella sede a pavimento. / 21. Infilare l'anta sul perno.
 20. Set again the pivot on the floor. / 21. Insert the door on the pivot.

22. Mantenendo l'anta aperta far scendere il perno superiore agendo sulla vite del cardine posto nel telaio.
 22. Keeping the door open, allow the upper pivot to fall, acting on the hinge placed in the frame.
